DETAILED ACTION

Drawings

With respect to Applicant's remarks in the amendment dated November 28, 2005, Applicant correctly remarks that box 10 was checked in the Office action Summary dated July 11, 2005 because formal drawings are requested on or before payment of the issue fee.

Allowable Subject Matter

Claims 1 – 12, 14 –19, 22, and 23 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Ammar shows a coupling assembly comprising a plurality of substrate layers and flange layer fusion bonded together in a stacked arrangement but does not teach or suggest at least the limitations of the independent claims where signal paths formed on at least two of the plurality of substrate layers are connected by plated via holes (claim 1); where the embedded signal processing circuitry comprises first and second signal processing circuitry coupled to the signal input and output respectively and to first and second signal connections exposed within the cavity (claim 22); where the flange layer comprises a substantially homogenous metal core and where the composite substrate layers comprise fluoropolymer composite materials (claims 14 and 23), nor would it be obvious to combine the prior art of record thus the claims are allowable.
